hospitals

Location: facilities\hospitals

Description
Polygons representing the two hospitals in Bay County. Points are in **hospitals_pt**.

Source
Bay County GIS created this polygon shapefile in October 1999 using our **parcels** shapefile. Parcel polygons were selected and copied in Arcview, using these references: parcel use description, parcel owner name, parcel address, 1999 telephone book, and digital aerial photos.

In January 2000, Bay County GIS created a coverage from this shapefile, for use as label points.

In May 2002, Bay County GIS corrected the location of Gulf Coast Medical Center. Also created a point shapefile **hospitals_pt.shp**, then deleted the hospitals coverage.
